

Understanding the Registry

Becoming an Executive User

It is recommended that each Medical Marijuana Treatment Center (MMTC) assign an Executive User for their organization. Executive Users have the ability to create and manage additional user accounts within their organizations.

To assign an individual as an Executive User in the Medical Marijuana Use Registry, complete the [Request for Access to the Medical Marijuana Use Registry Form](#) and notate “Executive User” at the top of the form.

The required training has been integrated into the Medical Marijuana Use Registry. Please indicate “Complete upon login” on your Request for Access form.

Submit the completed form to the Office of Medical Marijuana Use via email to MedicalMarijuanaUse@FLHealth.gov.

Please note: If an MMTC designates an Executive User, this is the **only** form that is required to be sent to the Department. All additional user information will be documented in the Registry as created by the Executive User.
